Dear Hiring Manager:

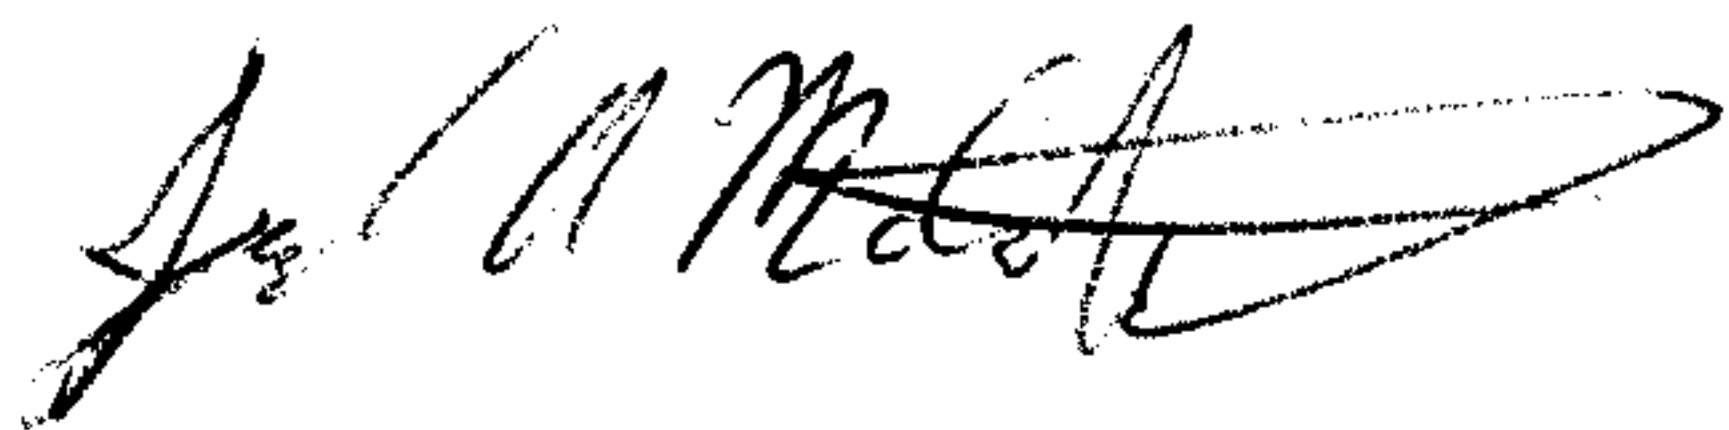

Suh'dutsing Telecom employed Ruba Qewar full-time as a 3D Modeler and Multimedia Developer. Her employment ended with us due to contract expiration. I had the pleasure of being her direct supervisor for three years. During that time her responsibilities included creating low and high-poly 3D models for real-time and pre-rendered media, rigging & animating, creating Physically Based Rendering (PBR) textures, creating motion graphics, editing & producing audio, and creating all manner of digital graphics for a wide variety of Interactive Multimedia Instruction (IMI) applications.

Ruba Qewar is an incredibly intelligent, motivated, talented, and kind individual. Her contributions to our development team went beyond digital asset creation. She shared her knowledge openly to improve our team's overall performance and established best practices. She maintained professional communication with her Subject Matter Expert (SME) points of contact, addressing their needs in a timely and effective manner. Ruba also took initiative to learn new software and techniques as customer requirements evolved.

I believe that Ruba would be a fantastic addition to any team lucky enough to have her, and I recommend her without hesitation.

If you would like additional information about Ruba Qewar, you can reach me at (334) 475-0061 or josephm@suhdutsingtelecom.com.

Sincerely,

Joseph McIntosh, PMP
